2021

Thanks to trauma-informed tools, dedicated team members, and mission-driven operations, in 2022 Shodair continues to remain steady through the COVID-19 pandemic. Remaining ever dedicated to Montana families and to a willingness to adapt and grow, Shodair's services now include psychiatric outpatient, case management and services within the public-school setting.

Putting the needs of Montanans first and foremost is part of Shodair DNA since the non-profit began 126 years ago and is a testament in that 99 percent of patients are from Montana.

## New Hospital

After many years in the same area, Shodair is currently building a replacement hospital and continues to fundraise for the \$14 million goal with the help of many generous donors. The campus expansion also includes a separate project that constructs a medical office building, which will house Shodair's Medical Genetics Program and Helena's Outpatient Services. The \$66 million effort means that more children can be helped. This addresses the urgent mental health need of young people as the number of teens that died by suicide is at an all-time high.

## New Hospital Features:

- 134,000 sqft on three floors solely dedicated to direct patient care
- Individual patient rooms and bathrooms
- Flexible shared spaces for patient care and learning
- Natural lighting
- Chapel and smudging room
- Extreme attention to safety and healing
- Separate admissions entrance
- Patient Pool
- New Café open to the public

Shodair accepts all insurances, including Montana Medicaid, private pay with an in-house financing option. Money should never be a barrier to care.

Shodair is certified in trauma-informed care and the leading resource in medical genetics and mental health in the state. Shodair is also Montana's only Children's Miracle Network Hospital and the only one in the network that is solely focused on mental health and genetic services.

Shodair continues to provide what Montanans deserve: the very best in care. We are grateful to all our donors, partners, advocates, families, employees, neighbors, supporters, vendors, and patients because we know we don't do any of it alone. Together we are better. And together, we can reach continue to meet our mission: To heal, help, and inspire hope.

## Shodair by the numbers 2021

- Patients from 52 of Montana's 56 counties
- Over 1,000 in-patient psychiatric patients in crisis served
- Genetics team served 1,400 individuals
- 800 genetic tests
- 75 percent of patients on Montana Medicaid
- 19 percent of patients are Native American
- More than 10,000 travel COVID tests
- More than 17,000 appointments

To help, heal and inspire hope
